FACTORY L'interpretazione dello stile industriale in chiave contemporanea, caratterizzata da un design minimale basato su linee sobrie ed essenziali. Nuove ispirazioni per l'abitare in cui la semplicità è sinonimo di bellezza ed emozione. Soluzioni flessibili, realizzate sempre "su misura al millimetro", con la cura artigianale che contraddistingue da sempre il carattere del vero **Made in Italy**, in linea con lo sviluppo dell'architettura sostenibile per inventare nuovi spazi.

FACTORY Interpreting the industrial style through a contemporary lens, featuring a minimalist design based on plain and essential lines. These are new living inspirations where simplicity means beauty and emotion. They feature flexible solutions, always "tailored to the millimeter" and with the artisanal care highlighting true **Made in Italy** products since their beginning, in line with the breakthroughs in sustainable architecture to invent new spaces.

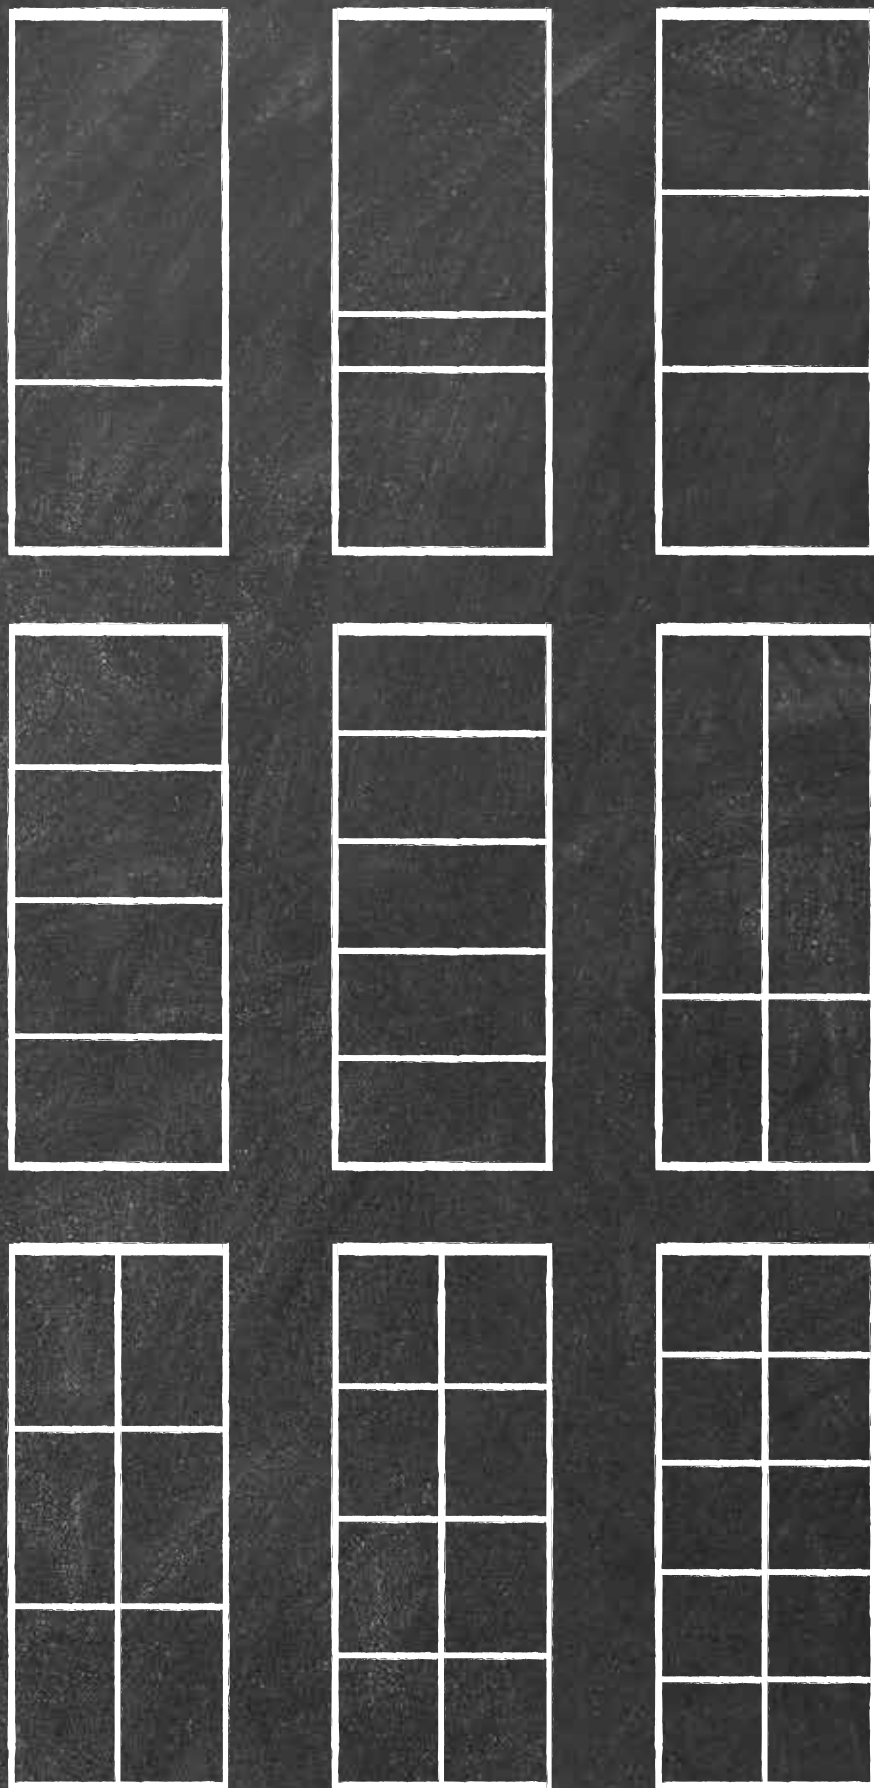

VETRO E LEGNO Il progetto creativo, orientato alla sostenibilità come nuova frontiera produttiva, predilige materiali interamente riciclabili di alta qualità, naturali ed ecologici. Il vetro, da sempre il vero protagonista delle proposte FOA, è valorizzato da un sottile perimetro in **legno** e da profili decorativi per creare riquadri proporzionati e della stessa dimensione. **Vetri di sicurezza stratificati di spessore 10÷11 mm**, a lastra intera, conferiscono alle ante grande stabilità e robustezza. Certificazione UNI-EN 12543.

V&L

GLASS AND WOOD Creative projects, focused on sustainability as a new production frontier, favor wholly recyclable, natural and eco-friendly high-quality materials. Glass, always the true protagonist of FOA products, is enhanced by a lithe wooden framework and by decorative elements to create proportionate and same-size squares here. The presence of **safety laminated whole sheet 10÷11 mm thick glass** (with a UNI-EN 12543 Certification) provides the shutters with great solidity and sturdiness.

La forma del design

La leggerezza ed il fascino luminoso del vetro uniti al calore naturale del legno. L'essenzialità e la varietà dei modelli, permettono ampia libertà di progettare soluzioni sempre nuove e differenti. La libertà di scegliere tra nuove finiture esclusive e combinarle con le numerose tipologie di vetri proposte, in diverse trasparenze e colorazioni, permette di creare strutture dall'identità inconfondibile. Architetti e interior designers potranno dialogare con il nostro Ufficio Tecnico per la realizzazione di progetti speciali. L'ideazione, il progetto e la produzione sono totalmente realizzati "su misura al millimetro" nella nostra fabbrica per offrire qualcosa di speciale ed unico, coniugando al design il **"saper fare"** del nostro personale altamente qualificato.

THE SHAPE OF DESIGN The lightness and the bright charm of the glass, together with the wood's natural warmth, as well as the essentiality and the variety of our models, afford great freedom in designing always new and different solutions. The freedom of choosing between new exclusive finishings and of combining them with the many kinds of glass we propose, featuring several degrees of transparency and colors, allows the creation of structures with a unique identity. Both architects and interior designers will be able to interact with our Technical Office to implement special projects. Design, project and production are carried out "fully tailored to the needs of our customers" in our factory, in order to offer something both special and unique, juxtaposing design with the **"know how"** of our highly-trained staff.
